

**Esercizio 1.** Let  $M$  be an  $L$ -structure and let  $\psi(x), \varphi(x, y) \in L$ . For each of the following conditions, write a sentence true in  $M$  exactly when

- a.  $\psi(M) \in \{\varphi(a, M) : a \in M\}$ ;
- b.  $\{\varphi(a, M) : a \in M\}$  contains at least two sets;
- c.  $\{\varphi(a, M) : a \in M\}$  contains only sets that are pairwise disjoint.

**Esercizio 2.** Let  $M$  be a structure in a signature that contains a symbol  $r$  for a binary relation. Write a sentence  $\varphi$  such that

- a.  $M \models \varphi$  if and only if there is an  $A \subseteq M$  such that  $r^M \subseteq A \times \neg A$ .

**Esercizio 3.** Let  $M \leq N$  and let  $\varphi(x) \in L(M)$ . Prove that  $\varphi(M)$  is finite if and only if  $\varphi(N)$  is finite and in this case  $\varphi(N) = \varphi(M)$ .

**Esercizio 4.** Let  $M \preceq N$  and let  $\varphi(x, z) \in L$ . Suppose there are finitely many sets of the form  $\varphi(a, N)$  for some  $a \in N^{|x|}$ . Prove that all these sets are definable over  $M$ .
